

A GENERATION FALLING THROUGH THE GAPS

Government school students in Andhra Pradesh face three converging crises.

THE NUMBERS

THE EXAM WALL — WHAT HAPPENS AFTER 12TH

AP DROPOUT TREND (SECONDARY LEVEL)

AI IS CLOSING THE EXIT — AUTOMATION RISK BY 2030

Sources: McKinsey 2023 task-level automation research • WEF Future of Jobs 2025 • Oxford Frey-Osborne Automation Probability Study

THE VICIOUS CYCLE — AND THE SOLUTION

How six linked failures trap students — and exactly where the intervention can act

FAMILY PRESSURE: MPC OR BIPC ONLY

Engineering or medicine — no third option accepted. Passion and aptitude are ignored.

Est. 80%+ of govt school students in Rayalaseema pushed into forced stream choice

STUDENT ENTERS WRONG STREAM

No genuine interest means rote memorisation. No portfolio, no real skill built across 4 years.

ASER 2024: only 40% of Class 8 students can do basic division — foundational gaps accumulate

FAILS ENTRANCE EXAM — NO BACKUP

JEE Advanced: only ~2% of all MPC students who appear actually qualify for an IIT seat.

2023: 180,372 appeared for JEE Advanced. Only 43,773 cleared it. 136,599 had no plan B. [NTA]

2–3 YEARS OF UNEMPLOYMENT

No degree, no skill, no portfolio, no income. Household finances deteriorate.

AP graduate unemployment: 24% — highest of all large Indian states [PLFS 2022-23, MoSPI]

AI AUTOMATES THE ONLY JOBS LEFT

Data entry, basic admin — the traditional fallback roles now face 75-86% automation by 2030.

McKinsey 2023: 86% of data entry tasks are already technically automatable today

LOSS OF CONFIDENCE — CYCLE REPEATS

Student internalises failure. Passes the same narrow expectations to the next generation.

WEF 2025: 92 million jobs displaced by 2030. New roles require skills never taught in govt schools

INTERVENTION: 9TH–10TH GRADE

Before stream selection locks in. While curiosity is still alive. This is where the program acts.

80 students • Kurnool govt school • 6 weekends • Dual track: Creative + Mechanical

THE OPPORTUNITY

India's creator economy

\$15 Bn

market size 2026

4.06M

active creators 2024

322%

growth in 4 years

930K

YouTube jobs in India

NEW JOBS BEING CREATED

170M

new roles by 2030

+78M

net job gain (WEF)

#1

AI dev — fastest growing • 1,000+ employers • 14M workers surveyed

THE SOLUTION

DUAL-TRACK INCUBATOR

Kurnool Govt School • 6 Weekends

CREATIVE

- Scripting & storytelling
- Mobile filming (CapCut)
- Canva graphic design
- Product demo video
- Pitch presentation

MECHANICAL

- Python (Google Colab)
- Data & logic basics
- Teachable Machine (CV)
- Crop yield AI model
- Build + test ML pipeline

40 students each • 8 pods of 5 • Pod Captain model

FINAL OUTPUT: AI model + demo film — built together like a real startup
